

CALL FOR PAPERS

ICSSET 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSET 2022 : International Conference on Simulation Software Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Simulation Software Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Simulation software
Computer simulations and applications
Advanced simulations for processes
Principles of computer simulations
Simulation and simulation modeling
Methodology of simulation software
Recent advances in simulation engineering
Simulation software, modeling and analysis
Practice of simulation
Computer simulators
Scientific simulators
Social simulators
Battlefield simulators

Emergency simulators
Vehicle simulators
Flight simulators
Driving simulators
Simulation games
Vehicle simulation games
Power system behaviour
Simulations of weather conditions
Simulations of electronic circuits
Simulations of chemical reactions
Mechatronics
Simulations of heat pumps
Simulations of feedback control systems
