

CALL FOR PAPERS

ICTCE 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTCE 2022 : International Conference on Transportation and Control Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Transportation and Control Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Transportation engineering	Freight transportation
Transportation planning and system optimization	Emergency response systems and technologies
Its theory and applications	Intelligent transportation systems
Traffic control and information technology	Energy saving and alternative energy
Transportation and socioeconomic development	Automotive exhaust treatment and environment protection technologies
Transportation security, environmental protection, and sustainable development	Transportation infrastructure (pavement, bridge)
Urban public transportation planning and management	Highway maintenance and management
High-speed railway planning, construction, and operation organization	Transportation management, economics and policy
Transportation safety	Vehicle operations
Transportation planning	Rail and transit systems
Air transportation	Water transportation
Marine transportation	Security and monitoring systems
Metropolitan transportation
