

CALL FOR PAPERS

ICWFCT 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWFCT 2022 : International Conference on Wireless Factory Communication Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Factory Communication Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Wireless factory communications
- Wireless communication for factory automation
- Wireless technologies in factory automation
- Wireless systems for factory and manufacturing
- High-performance wireless networks for critical industrial control
- Wireless industrial communication for sustainable manufacturing
- 5G and mobile networks for industrial communications

- Industrial wireless systems measurements, simulation, and testing
- Selection and deployment of wireless technologies in industry
- Standardization of industrial wireless systems
- Security for industrial wireless systems
- Wired and wireless convergence in industrial systems
- Practical guidelines for field deployment
