

CALL FOR PAPERS

ICNFSI 2022
Apr 08-09, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNFSI 2022 : International Conference on Nanotechnology in Food Science and Industry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanotechnology in Food Science and Industry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanotechnology in food industry
Nanotechnology in food science and technology
Functionality and applicability of food nanotechnology
Nanotechnologies for active and intelligent food packaging
Nanotechnology for synthetic biology
Nanoscale detection systems
Microtechnology in food science
Functional materials in food nanotechnology
Nanotechnology applications in food processing
Antimicrobial effects of silver nanoparticles
Food microstructure and health/nutrition interface
Nanotechnologies for process control and quality assessment

Microorganism detection and identification
Nanocarrier systems for delivery of nutrients and supplements
Surface-functionalized nanomaterials
Applications of nanotechnology in the agriculture sector
Naturally occurring nanostructures in food
Artificial nanostructures in food
Engineered inorganic nanoparticles in food
Nanoparticle-based delivery systems for nutraceuticals
New tools for pathogen detection, disease treatment delivery systems
Nanotechnology in food systems and packaging
Nanotechnology to improve safety and the nutritional value of food products
