

# CALL FOR PAPERS

**ICAMP 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMP 2022 : International Conference on Advanced Machining Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Machining Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- New cutting tools
- Benchmarking of machining processes
- Solutions for difficult-to-cut alloys
- Techniques to improve the cutting edge
- Machine tools for high performance machining
- Vibration problems in machining
- Coatings and new grades for tool materials
- Multitasking machines, a key for productivity and precision
- Tool wear and tool life

- Iron casting machining
- Solutions for stainless steels
- Thermal, high-pressure, hybrid assisted processes.
- Use of new 4.0 and analytics in machining
- New lubricoolant approaches
- Sustainability in machining: green machining
- Power consumption in machining
- Workers trained with new machinist skills
