

# CALL FOR PAPERS

**ICCRAVE 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCRAVE 2022 : International Conference on Control, Robotics, Automation and Vision Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Control, Robotics, Automation and Vision Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Control, automation, robotics and vision engineering	Sensor network systems
Control science and engineering	Delay systems
Adaptive control	Neural networks
Robust control	Fuzzy systems
Process control	Control of biological systems
Complex systems	Precision motion control
Co-operative control	Control applications
Identification and estimation	Control engineering education
Nonlinear systems	Automation science and engineering
Intelligent systems	Man-machine interactions
Discrete event systems	Process automation
Hybrid systems	Intelligent automation
Networked control systems	Factory modeling and simulation
