

CALL FOR PAPERS

ICCSE 2022
Apr 08-09, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSE 2022 : International Conference on Cybernetics, Complex Systems and Evolution is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cybernetics, Complex Systems and Evolution. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Evolutionary cybernetics
Evolution and cybernetics
Metasystem transition
Self-organization and evolution
Cybernetics and machine learning
Evolution of cybernetic or control systems
Evolution as phylogenetic learning

Biological versus machine reproduction
Evolutionary cybernetics and general systems theory
Information theory and evolution of cybernetic
Theory of automata and autopoiesis
Evolutionary theory of cybernetic systems
Theory of structures, functions
Mathematical models and simulations
