

# CALL FOR PAPERS

**ICDMSEA 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMSEA 2022 : International Conference on Dynamic Mechanical Spectroscopy, Engineering and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dynamic Mechanical Spectroscopy, Engineering and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical engineering  
Dynamic mechanical analysis  
Dynamic mechanical spectroscopy  
Viscoelastic properties of materials  
Dynamic moduli of polymers  
Applications  
Measuring glass transition temperature  
Polymer composition  
Instrumentation  
Types of analyzers  
Test modes  
Temperature sweep

Frequency sweep  
Dynamic stress-strain studies  
Combined sweep  
Design and analysis of mechanical systems  
Manufacturing and maintenance of mechanical systems  
Design, production and operation of machinery  
Modern tools  
Subdisciplines  
Mechanics  
Mechatronics and robotics  
Structural analysis
