

CALL FOR PAPERS

ICEMDC 2022
Apr 08-09, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEMDC 2022 : International Conference on Electrical Machine Drives and Converters is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrical Machine Drives and Converters. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Design of electrical machines and drives
Analysis, manufacturing and measurements for electrical machines and drives
Design and related problems
Materials
Thermal, losses and efficiency issues
Field computation
Analytical design
Optimal design
High frequency effects
Condition monitoring, diagnosis and testing
Monitoring and diagnosis
Fault detection
Measurements/instrumentation

Testing and standards
Noise and vibration problems
High frequency effects
Classical rotating field machines
Induction machines
Synchronous machines
Permanent magnet synchronous machines
Switched reluctance machines
Synchronous reluctance machines
DC machines
Innovative machines and actuators
Fractional slots machines
Linear machines
