

# CALL FOR PAPERS

**ICRAMPE 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAMPE 2022 : International Conference on Recent Advances in Mechanical Power Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Mechanical Power Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical power engineering	Automatic control of internal combustion engines
Control and safety equipment in refrigeration and air conditioning	Bio-energy
Advanced fluid dynamics	Boundary layer theory
Advanced measurements	Combustion engineering
Advanced thermodynamics	Combustion equipment for boilers
Advanced turbo-machines	Control of industrial furnaces, boilers and thermal processes
Aerodynamics	Convective heat and momentum transfer
Air distribution systems in air conditioning	Corrosion engineering
Air conditioning and ventilation applications	Economics of power generation
