

# CALL FOR PAPERS

**ICSAR 2022**  
**Apr 08-09, 2022**  
**Athens, Greece**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSAR 2022 : International Conference on Structure and Architecture is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structure and Architecture. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural architecture  
Structure and architecture  
Structural requirements  
Equilibrium  
Geometric stability  
Strength and rigidity  
Structural materials  
The relationship between structural form and structural efficiency  
Classification of structural systems  
The types of relationship between structure and architecture  
Structural design for architecture  
Steel structures

Reinforced concrete structures  
Timber structures  
Masonry structures  
The relationship between architects and engineers  
Loads, assumptions and idealizations  
Statically determinate vs. Indeterminate structures  
Trusses - analysis of member forces  
Moment distribution method  
Optimizing the building  
Fixed supported building  
Roller supported building
