

CALL FOR PAPERS

ICTCEGE 2022
Apr 08-09, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTCEGE 2022 : International Conference on Trends in Civil, Environmental and Geotechnical Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Trends in Civil, Environmental and Geotechnical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Soil mechanics and geotechnical engineering
Foundations and pavements
Geoenvironmental engineering
Geotechnics for transportation and infrastructure
Geotechnics of flysch
Geotechnics of hard soils
Ground improvement and soil stabilization
Investigations, classification and testing
Landslides and slope stability
Material characterization
Selection of parameters
Site investigations and in-situ testing and monitoring
Slope stability and landslides

Soil dynamics and geotechnical earthquake engineering
Soil mechanics and dynamics
Tunneling and underground structures
Unsaturated properties
Use as construction materials
Waste disposal and underground storage
Analysis of semi-rigid connections
Applied computer vision for civil and environmental engineering
Augmented and virtual reality
Buckling and stability
Building design, construction, and operation
Civil engineering, management and surveying
