

CALL FOR PAPERS

ICDCPRM 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCPRM 2022 : International Conference on Diagnosis, Classification and Prognosis of Rotating Machines is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Diagnosis, Classification and Prognosis of Rotating Machines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Health monitoring
Fault diagnosis and detection
Reliability and uncertainty
Nonlinear analysis
Physics of failure
Prognostics and health management
Remaining useful life prediction
and life assessment

Development of faults and their
effects with maturity
Developments of defects and their
correlation with diagnosis and
prognosis
New designs and developments
Applications of various techniques
such as vibration, sound, and
current signature
Wear modeling and analysis
Tribological analysis
