

CALL FOR PAPERS

ICDMTPG 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMTPG 2022 : International Conference on Data Mining Technologies for Petroleum Geology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Data Mining Technologies for Petroleum Geology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data Mining for Petroleum Geology
Data Interpretation in Petroleum
Geology
Model-Driven Data Mining for
Petroleum Geology
Data Mining in the Oil and Gas
Exploration
Computational Intelligent for
Reservoir Characterization

Data Mining Techniques for
Production Optimization
Soft Computing for Water Production
from Oil Reservoirs
Big Data technologies for Petroleum
Geology
Data Mining in
Multi-Geological-Factor Analysis
