

CALL FOR PAPERS

ICERC 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICERC 2022 : International Conference on Earthquake Resistant Construction is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Earthquake Resistant Construction. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering	Seismic performance assessment
Structural engineering	Earthquake simulation
Building structure	Structure simulation
Seismic design	Adaptive base isolation
Earthquake-resistant construction	Earthquake engineering structures
Base isolation system	Nonbuilding structure
Seismic performance	Building structures and technology
Functioning and safety of building structure	Modern building structure
Research on base isolation	Durability and sustainability
Seismic retrofit	Building physics
Vibration isolation	Structural design
Seismic sustainability	Building design
Vibration control	Structural pattern
