

CALL FOR PAPERS

ICFATD 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFATD 2022 : International Conference on Foundation Analysis, Testing and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Foundation Analysis, Testing and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Foundation analysis and design	Foundation parameter assessment
Raft foundation design and analysis	Subsurface investigations
Soil structure interaction and foundation analysis	Design of shallow and deep foundations
Deep foundation analysis systems	Retaining structures and lateral earth pressures
Foundation design and dynamic analysis	Analysis and design of isolated footing
Foundation analysis of offshore pile supported structures	Analysis and design of combined footing
Subsurface exploration and foundation analysis	Analysis and design of mat /raft footing
Analysis and design of foundation systems	Analysis and design of flat footing
Ground investigation and site soil profile
