

CALL FOR PAPERS

ICMECM 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMECM 2022 : International Conference on Metallurgical Engineering and Composite Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Metallurgical Engineering and Composite Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Metallurgical fundamentals and techniques
Nanotechnology, mining, metallurgical and material engineering
Carbon based materials
Casting and coating
Composite materials
High strength alloys
Instrumentation and control
Magnetic materials
Materials physics
Materials processing and handling
Metal processing
Mineral processing

Mining and safety
Mining fundamentals and techniques
Mining societal and economic aspects
New materials and performances
Petroleum engineering
Polymetric materials
Reservoir engineering
Semiconductors
Smart materials
Solidification
Surface phenomena
