

CALL FOR PAPERS

ICNCMESC 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNCMESC 2022 : International Conference on Nanostructured Carbon Materials for Energy Storage and Conversion is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanostructured Carbon Materials for Energy Storage and Conversion. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New methodology of the synthesis of nanostructured carbon materials such as carbon nanotubes, graphene, nanocarbon coatings, thin films, and assembled nanocomposites or architectures
Synthesis and fabrication of novel nanostructured carbon materials for special functions of lubrication, catalytic reaction and wettability with surface energy control

Applications in coatings, energy storage and conversion, fuel cells, and catalysts
Theoretical and fundamental study of new nanostructured carbon materials in lithium ion batteries and fuel cells
