

CALL FOR PAPERS

ICSECTI 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSECTI 2022 : International Conference on Software Engineering, Coding, Testing and Integration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Engineering, Coding, Testing and Integration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Software engineering
- Software evolution
- Software evolution laws
- E-type software evolution
- Software paradigms
- Software development
- Software design
- Programming paradigm
- Software development life cycle
- Software project management
- Software requirements
- Software design basics
- Software analysis and design tools

- Software design strategies
- Task analysis
- Domain analysis
- Project scheduling
- Resource management
- Project risk management
- Project estimation techniques
- Coding
- Testing
- Integration
- Implementation
- Operation and maintenance
