

# CALL FOR PAPERS

**ICSESS 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSESS 2022 : International Conference on Spatial Econometrics and Spatial Statistics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Spatial Econometrics and Spatial Statistics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spatial econometrics  
Spatial discrete choice models  
Heteroskedastic spatial models  
Static and dynamic spatial panel data models  
Computation issues in big spatial datasets  
Non stationary spatial models  
Resampling issues spatial models  
Bayesian spatial econometric models

Spatial limited dependent variable models  
Spatial duration models  
Spatial models with factor structures  
Strong and weak dependence in spatial models  
Endogenous spatial weights matrix in spatial models  
Spatial models with expectation  
Nonlinear spatial models
