

CALL FOR PAPERS

ICSITAIE 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSITAIE 2022 : International Conference on Software Integration Testing Approaches and Integration Errors is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Integration Testing Approaches and Integration Errors. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software integration testing	Requirements analysis
System software integration	System design
Phases of system software integration	Artifacts and roles for integration testing
Software components identification	Integration testing of object-oriented software
Component / module testing	Specification based testing
Integration testing approaches	Program based testing
Functional-level software integration	Top-down and bottom-up strategies
System-level software integration	Big-bang strategies
Different approaches to integration testing	Threads integration
Bottom-up integration	Critical integration
Top-down integration	Integration errors
Big-bang integration	Software performance assessment
Sandwich integration
