

# CALL FOR PAPERS

**ICSSET 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSET 2022 : International Conference on Simulation Software Engineering and Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Simulation Software Engineering and Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Simulation software  
Computer simulations and applications  
Advanced simulations for processes  
Principles of computer simulations  
Simulation and simulation modeling  
Methodology of simulation software  
Recent advances in simulation engineering  
Simulation software, modeling and analysis  
Practice of simulation  
Computer simulators  
Scientific simulators  
Social simulators  
Battlefield simulators

Emergency simulators  
Vehicle simulators  
Flight simulators  
Driving simulators  
Simulation games  
Vehicle simulation games  
Power system behaviour  
Simulations of weather conditions  
Simulations of electronic circuits  
Simulations of chemical reactions  
Mechatronics  
Simulations of heat pumps  
Simulations of feedback control systems
