

CALL FOR PAPERS

ICTCE 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTCE 2022 : International Conference on Transportation and Control Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Transportation and Control Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Transportation engineering
Transportation planning and system optimization
Its theory and applications
Traffic control and information technology
Transportation and socioeconomic development
Transportation security, environmental protection, and sustainable development
Urban public transportation planning and management
High-speed railway planning, construction, and operation organization
Transportation safety
Transportation planning
Air transportation
Marine transportation
Metropolitan transportation

Freight transportation
Emergency response systems and technologies
Intelligent transportation systems
Energy saving and alternative energy
Automotive exhaust treatment and environment protection technologies
Transportation infrastructure (pavement, bridge)
Highway maintenance and management
Transportation management, economics and policy
Vehicle operations
Rail and transit systems
Water transportation
Security and monitoring systems
