

# CALL FOR PAPERS

**ICUEDM 2022**  
**Apr 29-30, 2022**  
**Jerusalem, Israel**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUEDM 2022 : International Conference on Underground Engineering Disaster Mitigation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Underground Engineering Disaster Mitigation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical behavior of rock and rock-like materials

Characteristics of compaction, creep, and seepage of fractured rock mass

Theory and experiment of rock seepage and dynamics

Rock deformation mechanism and control technique in underground engineering

Catastrophic mechanism and prevention technique of water-inrush in underground engineering

Tunnel design and tunnel reliability assessment

Innovative techniques and applications of underground resource development

Study on numerical simulation methodology in rock engineering
