

CALL FOR PAPERS

ICWDG 2022
Apr 29-30, 2022
Jerusalem, Israel

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWDG 2022 : International Conference on Wildlife Demography and Genetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife Demography and Genetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|--|--------------------------------------|
| Wildlife demography | Population processes |
| Wildlife population dynamics | Analytical tools |
| Estimating population sex ratios | Continuous time models |
| Estimating productivity | Discrete time models |
| Estimating survival | Logistic population growth |
| Estimating harvest and harvest mortality | Age structure models |
| Estimating the rate of population change | Stage structure models |
| Analysis of population indices | Count data |
| Estimating population abundance | Conservation of wildlife populations |
| Integration of analytical techniques | Demography and genetics |
| Statistical concepts and theory | |
