The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSSDMT 2022 : International Conference on Decision Support Systems and Data Mining Techniques is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Decision Support Systems and Data Mining Techniques. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Decision support system
Computer-based information systems
Knowledge-based systems
History
Taxonomies
Components
Limitations and disadvantages
Development frameworks
Classification
Applications
Data mining techniques

Analytic techniques with traditional data access and retrieval functions
Underspecified problem
Flexibility and adaptability
Decision making approach
Communication-driven DSS
Data-driven DSS or data-oriented DSS
Document-driven DSS
Knowledge-driven DSS
Model-driven DSS
Information technology
Business information systems
