

CALL FOR PAPERS

ICWMP 2022
Apr 19-20, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWMP 2022 : International Conference on Wood Microbiology and Preservation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wood Microbiology and Preservation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wood microbiology	Chemical changes in wood caused by decay fungi
Forest mycology and plant pathology	Ultrastructural features of wood decay
Structural, chemical and moisture features of wood	Changes in the strength and physical properties of wood caused by decay fungi
General features, signs and effects on wood anatomy of wood decay.	Colonization and microbial interactions in wood decay
Trends in wood microbiology research	Biodeterioration of stored wood and its control
Wood deterioration agents	Wood stains and discolorations
The characteristics and classification of fungi and bacteria	Decay problems associated with some major uses of wood products
Factors affecting the growth and survival of fungi in wood	The detection of internal decay
Fungal metabolism in relation to wood decay	Natural decay resistance
Recognition, and anatomical aspects of wood decay	Chemical protection of wood
