

CALL FOR PAPERS

ICMTMA 2022
Apr 08-09, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMTMA 2022 : International Conference on Mechanical and Thermal Measurements for Aerospace is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mechanical and Thermal Measurements for Aerospace. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mechanical and thermal measurements for aerospace
Thermal noise and extreme metrology
Measurement and evaluation of reliability and safety in aerospace applications
Sdr for on-board and ground-based space applications and metrology
Photonic sensors for aerospace

Acoustic and electromagnetic antennas for aerospace measurement and applications
Reliability and fatigue of aeronautical components and materials
Test and measurement solutions for aerospace security and defence
Sensor systems and information fusion for aerospace applications
Telemetry systems for space metrology
