

CALL FOR PAPERS

ICDESHVS 2022
May 20-21, 2022
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDESHVS 2022 : International Conference on Distributed Energy Systems and High Voltage Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Distributed Energy Systems and High Voltage Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

High Voltage Engineering
Smart Grid Technologies
Renewable Energy
Safety and Security
Hydrogen and Fuel Cells
Power System Operation, Control,
and Automation
Power Generation Technologies and
Power Apparatus
Energy Storage Technologies
Power System Optimization
Wide Area Monitoring, Protection
and Network Control

Power Quality Monitoring and
Mitigation
Distributed Energy Systems
Distributed Generation and Power
Distribution Issues
Technologies for Grid Interfacing
Conditioners for Power and Energy
Systems
Signal Processing Applications in
Power Systems
Optimisation of Energy Components
and Systems
Power Energy Balance and Energy
Characteristics
Energy and Demand Side Management
