

# CALL FOR PAPERS

**ICMM 2022**  
**May 17-18, 2022**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMM 2022 : International Conference on Chemistry of Molecular Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Molecular Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular materials and nanosystems  
Synthesis, catalysis and molecular materials  
Chemistry of molecular materials  
Preparation, characterization and applications of molecular materials  
Modeling and design of molecular materials  
Molecular nanosystems and nanodevices  
Organic materials and nanosystems chemistry  
Organic and polymer chemistry and materials science  
Organic and polymer materials for optical, electronic and responsive devices  
Interface and physical chemistry of polymer materials  
Bio-inspired and multi-scale materials  
Advances in computational methods  
Modeling reactions and rational catalyst design

Rational drug design  
Modeling biomolecules  
Modeling interactions in molecular materials  
Applications of bioinformatics in the design of molecular materials  
Modeling materials for nanotechnology and molecular electronics  
Electronic molecular materials  
Magnetic molecular materials  
Molecular nanomaterials and biomaterials  
Optic molecular materials  
Porous molecular materials  
Simulation and computational modeling  
Surface science  
Technology transfer
