

# CALL FOR PAPERS

**ICEFR 2022**  
**May 27-28, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEFR 2022 : International Conference on Economics of Forest Resources is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Economics of Forest Resources. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |   |
|---|---|
| Forest economics                                  | Cost-benefit analysis of environment and timber production  |
| Forest management problems                        | External effects of forestry and forest industry            |
