

CALL FOR PAPERS

ICBCMBC 2022
May 13-14, 2022
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBCMBC 2022 : International Conference on Boron in Catalysis, Materials Chemistry and Boron Compounds is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Boron in Catalysis, Materials Chemistry and Boron Compounds. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Boron compounds
Diboranes
Metal-boron compounds
B-H Activation
Organometallic chemistry
Homogeneous catalysis
Boron in cross-coupling reactions
Borylation
Carbon-boron coupling

Catechol-, Pinacol-, and
Neopentane glycolborane
Fluorescence agents
Chromophores
Imaging
Luminescent organometallics
Nonlinear optics
Crystal Engineering
Synthetic Retinoids
Boron in biology
