

CALL FOR PAPERS

ICHSPP 2022
May 24-25, 2022
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHSPP 2022 : International Conference on Hypernuclear and Strange Particle Physics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hypernuclear and Strange Particle Physics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Production, structure and decay of hypernuclei
Multistrange systems
Production of strangeness
Interactions of mesons and baryons with strangeness
Strangeness in hadron structure

Kaonic nuclear systems and strange mesons in nuclei
Strangeness in astrophysics and in extreme forms of matter
Baryonic heavy flavour systems
Present and future facilities
