

CALL FOR PAPERS

ICRVS 2022
May 20-21, 2022
Berlin, Germany

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRVS 2022 : International Conference on Railway Vehicle Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Railway Vehicle Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Railway vehicle systems	Simulation technology for railway
Dynamics of railway vehicle	vehicle dynamics
systems	Railway track design
Analysis of dynamic systems	Matsudaira
Dynamics of railway vehicle	The ore competition
systems	Creep
Railway vehicle dynamics	The complete solution of the
Wheel -rail geometry	hunting problem
Wheel-rail rolling contact	Modern research on curving
theories	Dynamic response to track geometry
Modeling of rail vehicle	Suspension design concepts and
components	optimization
Tangent track response of railway	Derailment
vehicles	The development of computer
Lateral stability of railway	simulation
vehicles on tangent track	Active suspensions
Train dynamics	The expanding domain of rail
Interaction between railway	vehicle dynamics
vehicles and bridges	
Validation of railway vehicle	
system models
