

CALL FOR PAPERS

ICECM 2022
May 09-10, 2022
Dubai, UAE

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECM 2022 : International Conference on Energy Conservation and Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Energy Conservation and Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy conservation and management
Energy taxes and building design
Building technologies and smart meters
Domestic energy consumption
Energy crisis
Energy conservation law
Energy monitoring and targeting
Energy recovery
Green computing
Heat pump
High-temperature insulation wool

List of energy storage projects
List of low-energy building techniques
Low Carbon Communities
Marine fuel management
Minimum energy performance standard
One Watt Initiative
Overconsumption
Primary ways to improve energy conservation in buildings
Transportation
Consumer products
Energy conservation by the countries
