

CALL FOR PAPERS

ICPGAMM 2022
May 24-25, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPGAMM 2022 : International Conference on Geoinformatics for Applied Marine Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geoinformatics for Applied Marine Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Marine geoinformatics
Geoinformatics for marine and coastal management
Remote sensing for coastal and marine applications
Geoinformatic applications in marine management
Geoinformatics for fisheries management
Geoinformatics in hydrography and marine navigation
Spatial analysis for coastal vulnerability assessment
GIS resources in marine sciences
Geoinformatics in shipping and marine transport
Coastal marine geoinformatics
Marine image analysis and management

Marine geographical information science
Seabed characterization, dynamics and modelling
Data visualization and management in geoinformatics
Exploration geodynamics and interactive inversion
Satellite oceanography and marine geoinformatics
Indicators and geoinformatics for marine ecosystems
Indicators of sustainable ecosystems
Marine integrated ecosystem assessments
Distribution and recovery of data streams from various sources
Analysis of large amounts of data from various data sources
Digital platforms for information and service interaction
