

CALL FOR PAPERS

ICMM 2022
May 17-18, 2022
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMM 2022 : International Conference on Chemistry of Molecular Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemistry of Molecular Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular materials and nanosystems
Synthesis, catalysis and molecular materials
Chemistry of molecular materials
Preparation, characterization and applications of molecular materials
Modeling and design of molecular materials
Molecular nanosystems and nanodevices
Organic materials and nanosystems chemistry
Organic and polymer chemistry and materials science
Organic and polymer materials for optical, electronic and responsive devices
Interface and physical chemistry of polymer materials
Bio-inspired and multi-scale materials
Advances in computational methods
Modeling reactions and rational catalyst design

Rational drug design
Modeling biomolecules
Modeling interactions in molecular materials
Applications of bioinformatics in the design of molecular materials
Modeling materials for nanotechnology and molecular electronics
Electronic molecular materials
Magnetic molecular materials
Molecular nanomaterials and biomaterials
Optic molecular materials
Porous molecular materials
Simulation and computational modeling
Surface science
Technology transfer
