

CALL FOR PAPERS

ICCTIP 2022
May 03-04, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCTIP 2022 : International Conference on Cybernetic Technology and Image Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cybernetic Technology and Image Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Cybernetic technology
- Cybernetics
- Intelligent systems and robotics
- Innovative designs
- Advanced controls
- Enhanced perception and cybernetics
- Robust manipulation
- Fuzzy systems
- Neural networks
- Genetic algorithms
- Evolutionary computation
- Image processing
- Computer vision

- Systems modeling and control
- Smart sensor networks
- Cyber-physical systems
- Regulation in biological systems
- The Marconian machine
- Regulation and control
- Transformation
- Repeated change
- The determinate machine
- Coupling systems
- Independence within a whole
- The very large system
- Stability
