CALL FOR PAPERS

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCVPA 2022 : International Conference on Voice and Vision Processing Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Voice and Vision Processing Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Audio compression and coding
- Acoustic scene understanding and classification
- Language acquisition and reproduction
- Human language understanding and learning
- Speech recognition and understanding
- Image filtering and enhancement
- Image segmentation and understanding
- 3D modeling and visualization
- Deep learning technology in computer vision
- Neural information processing and computational intelligence
- Smart signal and information processing
- Object recognition and reidentification
