

# CALL FOR PAPERS

**ICZPM 2022**  
**May 17-18, 2022**  
**Sydney, Australia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICZPM 2022 : International Conference on Z-Plane in Mathematics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Z-Plane in Mathematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Z-plane  
Geometric representation  
Complex analysis  
Complex-valued functions  
Notational conventions  
Argand diagram  
Stereographic projections

Cutting the plane  
Multi-valued relationships and  
branch points  
Restricting the domain of  
meromorphic functions  
Specifying convergence regions  
Quadratic spaces  
Potential theory in the complex  
plane  
Second order differential  
inequalities in the complex plane
