

# CALL FOR PAPERS

**ICCEMA 2022**  
**May 27-28, 2022**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEMA 2022 : International Conference on Computer, Electronics, Mechanical and Aeroengineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer, Electronics, Mechanical and Aeroengineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Aeroengineering	High-speed aerodynamics
Aeroengineering and management	Industrial aerodynamics
Airport management and operations	Integrated systems design
Aircraft maintenance management	Managing creativity and innovation
Aircraft structural analysis and design	Managing innovative change
Aircraft vibration and aeroelasticity	Marketing management
Aviation logistics and supply chain management	Operations management
Aircraft propulsion and gas turbine engines	Project management
Avionics and aircraft systems	Propulsion and turbomachinery
Computational fluid dynamics	Safety management
Contemporary issues in human resource management	Transport management
Flight mechanics	Turbomachinery
Fluid mechanics
