

CALL FOR PAPERS

ICSDMDC 2022
May 20-21, 2022
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDMDC 2022 : International Conference on Software Design Methods and Design Complexity is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Design Methods and Design Complexity. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software design methods Strategies
Structured design
Function oriented design
Design process
Object oriented design
Design process
Software design approaches
Top down design
Bottom-up design
Software design complexity
Software implementation
Structured programming

Functional programming
Programming style
Data elements
Data store
Data processing
Software design levels
Modularization
Concurrency
Cohesion
Coupling
Design verification
