

CALL FOR PAPERS

ICWSIE 2022
Jun 14-15, 2022
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWSIE 2022 : International Conference on Wireless Systems for Industrial Environments is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Systems for Industrial Environments. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Industrial wireless systems
Wireless systems for industrial environments
High-performance wireless networks for critical industrial control
Wireless industrial communication for sustainable manufacturing
5G and mobile networks for industrial communications
Industrial wireless systems measurements, simulation, and testing

Selection and deployment of wireless technologies in industry
Standardization of industrial wireless systems
Security for industrial wireless systems
Wired and wireless convergence in industrial systems
Practical guidelines for field deployment
