

CALL FOR PAPERS

ICWDPCD 2022
Jun 03-04, 2022
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWDPCD 2022 : International Conference on Wildlife Demography, Population Change and Dynamics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife Demography, Population Change and Dynamics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wildlife demography	Population processes
Wildlife population dynamics	Analytical tools
Estimating population sex ratios	Continuous time models
Estimating productivity	Discrete time models
Estimating survival	Logistic population growth
Estimating harvest and harvest mortality	Age structure models
Estimating the rate of population change	Stage structure models
Analysis of population indices	Count data
Estimating population abundance	Conservation of wildlife populations
Integration of analytical techniques	Demography and genetics
Statistical concepts and theory
