

CALL FOR PAPERS

ICATE 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICATE 2022 : International Conference on Advances in Timber Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Timber Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Timber engineering	Safety and serviceability in timber engineering
Wood in civil engineering	Timber and wood-based products
Architecture, wood and civil engineering	Short- and long-term deformations of timber structures
Wood constructions	Vibrations of timber floors
Problems in wood construction	Design for earthquake resistance
Wood-based structural elements	Joints and structural assemblies
Mechanical properties of wood	Fasteners, joints and composite structures
Structural timber - variability and statistical modelling	Structural adhesive joints
Mechanical performance and modelling	Shear walls and diaphragms
Engineered wood products for structural purposes	Composite structures
Effects of climate and climate variations on strength	Sustainable Forest for Lumber Production
Design aspects of timber structures
