

# CALL FOR PAPERS

**ICCDE 2022**  
**Jun 21-22, 2022**  
**Vienna, Austria**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCDE 2022 : International Conference on Crystal Defects is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Crystal Defects. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Crystal defects  
Crystallographic defect  
Thermomechanical processing  
Point defects  
Line defects  
Planar defects  
Bulk defects  
Volume defects  
Two-dimensional defects  
Mathematical classification  
methods  
Computer simulation methods  
Vacancies  
Interstitials

Impurities, weight and atomic  
composition  
Interstitial solid solutions  
Composition / concentration  
Composition conversions  
Space and time scales  
Finite size effects  
Diffuse scattering  
Classification of disorder in  
crystals  
Substitutional disorder  
Dynamic displacive disorder  
Simple diffuse scattering  
calculations  
Experimental techniques  
Electron microscopy
