

CALL FOR PAPERS

ICCIT 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCIT 2022 : International Conference on Computer and Internetworking Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer and Internetworking Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Internetworking technologies
Constituents, hierarchy,
classification of networks
Hierarchical internetworking design
models
Multimedia internetworking
technology
Multimedia communication
Internet programming and World Wide
Web
Internetworking technologies and
data mining
Data security, trust and
reputation
Big data and cloud computing
Mobile and wireless networks
Network protocols, modelling,
optimization and performance
evaluation
P2P and grid computing
Distributed and parallel systems

Ontologies and metadata
representation
Knowledge discovery and mining
Databases and data warehouses
Data centers and it virtualization
technologies
Web science and business
intelligence
Data analytics for learning and
virtual organizations
Data management and information
retrieval
Machine learning on large data sets
and massive processing
Data modeling, visualization and
representation tools
Nature inspired computing
Data sensing, integration and
querying systems and interfaces
E-science data sets, repositories,
digital infrastructures
Energy-aware and green computing in
data science
