

CALL FOR PAPERS

ICDCCCA 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCCCA 2022 : International Conference on Descriptive Crystal Chemistry and Crystallography Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Descriptive Crystal Chemistry and Crystallography Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Descriptive crystal chemistry
Crystallography
Atomic resolution
Catalysts
Colloidal crystallization
Computed radiography
Crystal defects
Crystal structure and properties
Crystallization solutions

Crystallography research
Advanced crystallography
Crystallography in biology
Chemical crystallography
Crystal growth
Crystallography of novel materials
Electron crystallography
Recent development in the x-ray studies
Crystallography applications
