

CALL FOR PAPERS

ICEPA 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEPA 2022 : International Conference on Electroactive Polymers and their Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electroactive Polymers and their Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Electroactive polymers
- Analysis and simulation of electroactive polymers
- Electroactive polymer-ceramic composites
- Electro-active shape-memory polymer composites
- Electroactive polymer/graphene oxide nanostructured composites
- Multiscale modeling of electroactive polymers
- Electroactive polymers for robotic applications
- Computational design and fabrication of electroactive polymers
- Electroactive polymer composite fabrication, characterization, evaluation, and application
- Re-use, recycling and degradation of electroactive polymers
- Reprocessing of electroactive polymers
- Recent developments in electroactive polymers
- Electroactive polymer composite evaluation and processing
- High performance electroactive polymers
- Electroactive polymers for engineering applications
- Hybrid electroactive polymers
- Tensile and compression properties of electroactive polymers
- Mechanical and dynamic mechanical analysis of electroactive polymers
- Commercial and experimental electroactive polymers
- High strength electroactive polymers
- Atomic structure and structural stability of electroactive polymers
- Structural modeling of electroactive polymers
- Classification of electroactive polymers
- Processing, markets and applications of electroactive polymers
- Structure of electroactive polymers
- Mechanical properties of electroactive polymers
