

CALL FOR PAPERS

ICNST 2022
Jun 21-22, 2022
Vienna, Austria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNST 2022 : International Conference on National Security Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of National Security Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

National security	Territorial disputes
National security management	Illegal immigration
Security risks and precaution	Transnational crime
National security policies and strategies	International surveillance
National security and common problems	Border security
National security suggestions and applications	Counter-terrorism
National cyber security and information technologies	Defense strategy
National security studies	International security
Security environment	Intelligence capability
Current and common national threats	Cyber security
Maintaining peace and regional stability	Foreign trade
Religious extremism	Investment and privacy
